

## AMS 7 and 7L: Resources available to you

- **Instructor**

- **David Draper** (DD): office Baskin Engineering (BE) 135, phone 459–1295,  
email [draper@ams.ucsc.edu](mailto:draper@ams.ucsc.edu)

- **TAs**

- **Juan Carlos Laguardia** (JCL): office BE 142, phone 459–1413,  
email [jlaguard@ams.ucsc.edu](mailto:jlaguard@ams.ucsc.edu)
- **Nikki Targowski** (NT): office BE 142, phone 459–1413,  
email [nikkit@ams.ucsc.edu](mailto:nikkit@ams.ucsc.edu)

- **Discussion sections**

Section	Day	Time	Place	Instructor
01A	M	9:30–10:40am	Engineer 2 192	DD
01B	Tu	8:30–9:40am	Soc Sci 2 179	NT
01C	W	2:00–3:10pm	Engineer 2 194	NT
01D	Th	noon–1:10pm	Engineer 2 194	NT

As noted in class, your job is to pick one of these 4 discussion sections and attend it regularly (from time to time you can go to another one if necessary, but please try to go to your regular section as much as possible). For the first hour the instructor will lead a discussion in which (if you want) you participate in solving a number of problems like the ones on the homework; in the last 10 minutes there will be a short easy quiz problem (like the ones just solved in the first hour) for you to turn in, as a way to give you feedback on how you're doing. New material will be introduced in discussion sections every Monday (i.e., in Section 1A, starting on Mon 8 Jan) and that same material will be given on Tue, Wed, and Thu (i.e., in Sections 1B, 1C, and 1D); then new material will be introduced the next Monday, and so on. **Mandatory attendance at discussion sections begins in the week of Mon-Fri 8–12 Jan 2007.**

Holidays to note this quarter: no classes of any kind (discussion sections or labs) will be held on campus on **Mon Jan 15** and **Mon Feb 19**; if your regular discussion sections take place on Mon, you'll need to go to one of the other discussion sections during those two weeks of this quarter.

- A limited number of hours of **one-on-one tutoring** help in this class are available—please email or speak with Angela to arrange this.
- **Library** Several copies of the required text by Triola and Triola (T&T) will soon be available at the Science and Engineering Library on 2-hour reserve — just ask for AMS 7.

- **Office hours** (effective from Wed 10 Jan 2007): all office hours will begin at the location listed below and will then continue in a place called *Jack's Lounge* in BE (the open area with whiteboards near BE 148).

Day	Time	Place	Who
Mon	12.30–1.30pm	BE 142	NT
Tue	11am–noon	BE 142	NT
Wed	4–5pm	BE 135	DD
Thu	9–10am	BE 142	JCL
Fri	10–11am	BE 135	DD

All of us are available during any of these office hours to answer any questions you may have about the lectures, discussion sections, or readings, and we'll give (liberal) hints on how to do the homework assignments.

- **Labs**

Section	Day	Time	Place	Instructor
01	M	1:30–3:30pm	BE 109	DD
02	Tu	9:30–11:30am	BE 109	JCL
03	W	11:30am–1:30pm	BE 109	JCL
04	Th	7:00–9:00pm	BE 109	JCL

(As mentioned in class, Lab Section 05 has been canceled.) Your job is to pick one of these 4 lab sections and attend it regularly (from time to time you can go to another one if necessary, but please try to go to your regular section as much as possible). For approximately the first hour of each lab new material will be introduced on how to use the statistical package JMP to do data analysis (sometimes new methods will be described in these labs); then during the second hour the lab instructor will move around the room helping you with any difficulties or questions you may have. There will often be a lab assignment given in one particular week and due one or more weeks later — you can use the second hour to work on this assignment. New material will be introduced in lab sections every Monday (i.e., in Section 01, starting on Mon 9 Jan) and that same material will be given on Tue, Wed, and Thu (i.e., in Sections 02, 03, and 04); then new material will be introduced the next Monday, and so on. **Mandatory attendance at labs begins in the week of Mon-Fri 8–12 Jan 2007.**

Holidays to note this quarter: no classes of any kind (discussion sections or labs) will be held on campus on **Mon Jan 15** and **Mon Feb 19**; if your regular labs take place on Mon, you'll need to go to one of the other labs during those two weeks of this quarter.
