

Homework assignment #4 and #5

Analysis of Clinical Trials

Do a side-by-side comparison of two clinical trials from the class reader, or from the scientific literature. You can use this table as a starting point, but don't limit yourself to one line. Several drug trials are presented in the class Reader, on pages noted below.

- Herpes vaccine clinical trial (p169)
- TNF receptor clinical trial (p233)
- CD20 clinical trial (p243)
- Efalizumab clinical trial (p279)
- Herceptin clinical trial (p301)
- Bevacizumab clinical trial (p333)

Aspect of clinical trial	1st trial	2nd trial
Description of drug		
Indication		
Animal model, if any		
Drug design		
Trial design		
Number of study arms		
Number of participants for each arm		
Dose regimen(s)		
Length of dosing period(s)		
Comparator or placebo		
Narrative description of clinical cohort		
Age criteria		
Gender		
Relevant Inclusion criteria		
Relevant Exclusion criteria		
Primary endpoint		
Secondary endpoint(s)		
Efficacy measurement		
Response rate		
Safety concerns
