CMPS180, Winter 2005, Pair-Programming Log

Your Name (print): _____

Partner's Name (print): _____

Assignment Number: _____ Due Date: _____

Date	With partner: I'm driving	With partner: I'm reviewing	Working alone	
				Grand Total
SubTotal minutes				

Enter the date and the amount of time in minutes in the appropriate box or boxes, compute the total, and sign below. As a reminder, each partner should "drive" roughly 50% of the time the team is working together, and at most 25% of an individual's effort for an assignment can be spent working alone. Any work done by a solitary programmer must be reviewed by the partner. The object is to work together, learning from each other, not to divide the work into two pieces with each partner working on a different piece. You may continue the log on the back of the paper if necessary.

As you answer each of the questions below, please keep in mind that your assignment will only be evaluated on the basis of readability and functionality. Your answers to the questions listed below will NOT affect your grade in any way.[1]

1. On a scale from 0 (not at all confident) to 100 (very confident), how confident are you in your solution to this assignment? _____
2. How much did you enjoy working on this project assignment?

1	2	3	4	5	6	7
very Unenjoyable			neutral			very enjoyable

3. How satisfied are you with the way that you and your partner worked together on this assignment?

1	2	3	4	5	6	7
very DISsatisfied			neutral			very satisfied

Optional Comments:

Signature: _____

[1] The instructor will not see this data until after final course grades are submitted, except that a TA or other staff person will review the log for conformance with the 50% shared driving rule and the 25% work alone rule.
