

Project - 290 - Spring 04

mw

May 4, 2004

The project needs to be related to the course material. However otherwise you are free to choose.

Three types:

- Survey project: Survey some articles that expand on the material covered in class.
- Theory project: Do a small piece of original theoretical research related to the course material.
- Practical project: Apply what you learned to some practical data

It should take you about three weeks of class time to finish the project. All projects require a detailed final report that is due on the last day of final's week in my mail box.

There will also be a poster session during final's week.

By next Tu (May 11) I would like a **one page project proposal** (handed in in class). Feel free to come by for discussing ideas.
