

**BASKIN SCHOOL OF ENGINEERING**  
**BIOENGINEERING (BENG) MAJOR**  
**2007-2008**

***TIPS ON PLANNING:***

- Use the schedule planner on the back of the [BENG curriculum chart](#) to put together a plan.
- Cross off all courses completed on the [BENG curriculum chart](#) to help you keep track of course progress.
- Use the [BENG curriculum chart](#) to write down which quarters each of the courses you have left to take are offered. Refer to the [class schedule](#) to find out when courses are being offered.
- Check the general catalog: <http://reg.ucsc.edu/catalog/> or individual department websites for course descriptions, and when non-SoE courses are offered (i.e. math, physics, art, etc.).
- Make sure you pay attention to course prerequisites. Lack of planning could result in delaying when you can take courses and result in a necessary extension of enrollment.
- Plan your schedule for the rest of your time at UCSC based on this year's [class schedule](#). We strongly recommend checking each year's [class schedule](#) as they become available to ensure your courses will still be offered as planned.
