eBay-Google Bayesian Short course

Mid-course survey of form and content

If you could please fill this out anonymously, fold, and give to me sometime during today's meeting, that would be great.

1. Please circle the answer that most closely describes the situation for you: the present **pace** in the course is

too	about	too
slow	right	fast

2. If your answer in question 1 was anything other than "about right," **how should I remedy the pace**? (For example, what kinds of things should I skip or cover faster if the course is going too slowly for you, or what should I cover more slowly or spend more time reviewing if it's too fast?)

3. Please circle the answers that most closely describe the situation for you with regard to the present **mix of mathematical and statistical details** in the course:

too	math	not
many	details	enough
math	about	math
details	right	details

too	stat	not
many	details	enough
stat	about	stat
details	right	details

4. If your answers in question 3 involved anything other than "about right," **how should I remedy the level of detail**? (For example, what kinds of math or stat topics should I go through more, or less, thoroughly?) (Please continue on the back under item 8 if needed.)

5. Bearing in mind that the material builds in complexity and that therefore we need to work toward examples of direct relevance to your work (at, e.g., *eBay* or *Google* or ...) rather than jumping into them immediately, please circle the answer that most closely describes the situation for you with regard to the present **mix of substantive areas of the examples and problems** in the course:

not enough examples/problems of direct interest to me

substantive areas of examples/problems about right for me

6. If your answer in question 5 involved anything other than "about right," **what topic areas would you like to see more of in the examples and problems**?

7. If the course were finishing soon, what would your **overall rating** be?

poor   fair   OK   good   excellent

8. Please add any other comments that would help me to **better tailor the course to your needs**.
